ABOUT

CNCA is an architectural practice based in Surrey, set up by Christopher Nicholas Christophi. Since it's launch CNCA has taken on board a vast and diverse range of briefs in both the residential and commercial sector.

At CNCA, we believe in providing a friendly design led service, bespoke to each client with a focus on taking your vision and brief to create a project that is incredible, inside and out.

We will work closely to guide you each step of the way, through detailed consultation to establish your requirements and provide innovative and desirable solutions to maximise the potential of your project.

Our experience ranges from working with clients wishing to extend, build or redesign their homes, to investors and developers looking to improve the commercial viability of their residential and commercial properties all from feasibility to detailed design stages.

For further information on the services we provide and the process we follow, please take time to browse our services

“Thank you for taking the time to consider us for your project and we look forward to the opportunity to unlocking the potential in your property. Please look through a variety of projects from our portfolio and we are happy to share each project in more detail or others within our portfolio.”

ABOUT

Christopher Nicholas Christophi is an award-winning architect who has worked in various leading design studios including the world-renowned architectural firm Foster and Partners.

Through-out his career, Christopher has delivered major residential and commercial schemes throughout the UK, including the Stirling award winning project, The Bloomberg Building, a new HQ for Bloomberg spanning over 2 acres in the centre of the City of London.

Other award winning projects include the regional award winning scheme One Station Square, a 142,000 sqft mixed use commercial scheme in Cambridge, UK as well as the WAF nominated project, 150 Holborn, a new and innovative HQ building and high-end residential scheme in Chancery Lane, London.

In 2017 Christopher was awarded the British Council for Offices award for the Next Gen Young Architect of the year for his contribution to the industry.

Over the past eight years Christopher's architectural design and research work has received national and international
